

## How to Make a Plumeria Hair Decoration

You will need a toothpick and five flowers (4 of one color and 1 different color for center flower).

Remove 1 petal from flower \#2.

Make sure flower \#2 is under the center flower

Start with the center flower. Insert the toothpick horizontally through the stem.

Insert toothpick into flower \#2 on the side where the petal was removed.

Remove one petal from flower \#3 and continue on the opposite side.

Move the flower to the center of the toothpick.

Slide flower \#2 up next to the center flower. The two flowers should be hugging each other.

Do the same with flowers \#4 and \#5, sliding each flower under the last one. Use bobby pins to secure in hair, above the right ear (single/looking) or left ear (married/unavailable).
